

CHILD DEVELOPMENTAL SCREENING AND SURVEILLANCE WEB TRAINING

The Child Developmental Screening and Surveillance web training is available on the Texas Health Steps Online Provider Education website:
<http://www.txhealthsteps.com/>

The goal of this module is to equip Texas Health Steps providers and others to conduct developmental surveillance and screening during preventive medical checkups for children birth through 6 years, use approved screening tools, make appropriate referrals, and coordinate care in the primary care setting.

Continuing education units are available for physicians, nurses, social workers, and Certified Health Education Specialists.

Please distribute this information to your Medicaid provider networks, and contact your Managed Care Compliance & Operations (MCCO) team for any questions.
